EXPERIENCE

Vodafone Group, Remote. — Lead Frontend Software Engineer

SEPT 2022 - PRESENT

Frontend Engineering Lead responsible for pioneering, architecting and building a Next Generation UC Vodafone Business platform using the latest and greatest from the React ecosystem.

Vodafone Group, Remote / Newbury, UK. — Frontend Software Engineer

SEPT 2019 - SEPT 2022

Frontend Engineer architecting and building enterprise-ready Frontend applications, their deployment structure and performance in the browser using React & TypeScript for B2B Unified Comms. (UC) products.

Almighty Records, Painswick, UK. — Social Media Manager

AUG 2018 - FEB 2019

Managing all social media platforms, marketing strategies and customer relations. During my time, I was responsible for increasing Twitter following by 87%, Instagram following by 247%

Illumi Media, Remote. — Founder & Talent Manager

DEC 2017 - PRESENT (Freelance, Self-employed)

In 2017, I founded Illumi Media, a small brand under which I fulfilled Talent Manager roles for various talent agencies. Some clients included MrBeast (100M+ subscribers), Destiny (1M+ Twitch followers) and more.

Some talent agencies included: LFMTalent, Render.gg and Voddity.

Additionally, this is also the brand under which I built various Software as a Service applications, including www.creatorsites.net, www.retroplan.io and more using self-taught Full-Stack development skills.

LANGUAGES

Latvian (Native), British English (Second Native) and Russian (Conversational)

SKILLS

Ability to provide a strong, dependable backbone for any Frontend team.

A natural passion for maintainable, quality code.

Extensive technical skills include: TypeScript, React, Express, MongoDB, Component Libraries, Micro Frontend Architecture, Monorepos, GitLab CI, Experience deploying Scalable Frontends to most popular cloud providers: GCP, AWS, CloudFlare Pages & DigitalOcean Spaces.

VOLUNTEERING

CodeFirstGirls

I taught a class of over 20+ girls interested in STEM how to code in JavaScript and land their first job in the tech industry.

Vodafone Frontend Engineering Guild

I helped bridge Frontend

EDUCATION

Lancaster University, Remote — BSc. Digital Technology Solutions (Software Engineer)

SEPT 2019 - JULY 2023 (PRESENT)

Studying for my DTS (Digital Technology Solutions) Bachelor's Degree in Software Engineering. As of January 2023, I am on track to graduate with a 1st Class Bachelor's Degree in July.

Gloucestershire College, Gloucester, UK. — BTEC Software Engineer, Distinction Star (*)

2017 - 2019

College course in Organisational System Security, Project Planning, Web Development and more. Completed with the highest grade Distinction*

PROJECTS

Vodafone Business UC Hub — Monorepo and Micro Frontend Architecture Implementation

I built a Lerna Monorepo and a Micro Frontend architecture on AWS S3, deployed and built by GitLab CI to allow the Frontend to be extensible to new products and allowing teams to work on them independently.

Vodafone Business UC with RingCentral — Serving as a UX Consultant to a Vodafone External Contracting Agency

<https://www.vodafone.co.uk/business/unified-communications/vodafone-with-ringcentral>

I was one of a handful of employees who collaborated with RingCentral and an external UX/UI design contracting firm to create a user flow for an upcoming collaboration that worked best for both our customer groups.

Vodafone Business CallFlow Editor — Complete Application Rewrite from Angular to React

<https://www.vodafone.com/business/solutions/unified-communication/vodafone-business-interactive-voice>

Developed a rewritten, "Beta" version of an existing drag-and-drop Call Flow creation tool using React, Webpack, Tailwind and React Flow. The new solution was built into a distributable private NPM package, versioned by the Semantic Release framework.

Engineers from over 6 different markets (including Italy and Egypt) by being one of the three core founders of the internal employee Frontend Engineering Guild.

Vodafone Digital Camp

When COVID first hit, Vodafone's Digital Camp was going virtual for the first time ever. I helped to manage and run the event where over 300+ participants learnt about technology and careers at Vodafone Group.
